Recommendation: Use the Tight Rule for automatic transaction holds (high precision, low false alarms). Use the Wide Rule to route borderline transactions to a human review queue.

Tight vs Wide Rule Comparison

Rule	Catch_Rate_%	False_Alarms	Frauds_Caught	Precision_%	Total_Flagged
Tight	66.80	414	316	43.29	730
Wide	92.80	76109	439	0.57	76548

Proposed Analytical Trigger — Tight Rule $V14 < -1$ AND $V3 < -1.8$ AND $V17 < -0.8$

Proposed Analytical Trigger — Wide Rule $V14 < -1$ OR $V3 < -1.8$ OR $V17 < -0.8$
